

INFERNOX

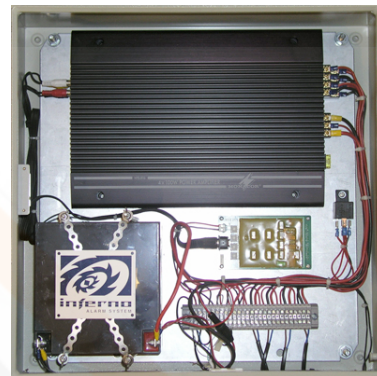

SOUND BARRIER : DATA SHEET

- ⇒ renders the protected area uninhabitable & forces intruders to retreat immediately.
- ⇒ significantly reduces costs of intrusions by limiting the intruders' time inside.
- ⇒ generates an utterly intolerable sound spectrum, broadcast at 125dB+.
- ⇒ massively powerful commercial / industrial sound barrier with multi-zone protection.
- ⇒ compatible with all existing alarm systems, simple to retrofit and install.
- ⇒ ultra-high Swedish quality & durability.

The InfernoX is the ultimate sound barrier. A massively powerful device designed to protect areas up to 800m², it is aimed at the commercial and industrial markets. Connected to a maximum of 16 speakers (in groups of 4), the InfernoX can protect a single space or a combination of larger and smaller spaces. The sound generator and amplifier are protected in an IP65 classed lockable industrial case, making it ideally suited to installation in harsh & environments.

Inferno sound barriers protect premises and objects that demand a heightened level of security. They are typically deployed in situations where conventional security equipment has/will fail to provide sufficient protection. The intruder depends on the "window of opportunity" that exists between detection and arrival of security personnel. By rendering an area uninhabitable, the sound barrier destroys this window and with it, the

intruder's ability to inflict damage and loss. The InfernoX's patented sound generator has recently been optimized, resulting in substantially improved runtime. Designed, manufactured and assembled in Sweden to ultra-high standards, the InfernoX is truly a force to be reckoned with when it comes to protecting large spaces and valuable items.

TECHNICAL SUMMARY

Protective capability:	200m ² - 800m ²
Dimensions: (mm)	500 x 500 x 210
Weight:	37kg + speakers
Frequency range:	2 - 5kHz
Acoustic effect:	> 125dB (A)
Battery backup:	27Ah, Pbg
Battery lifetime:	3 years
Power consumption:	12V DC, <10mA
Runtime:	> 20 minutes
Temperature range:	-10 to +60°C
IP class:	IP65

The cost of an intrusion is directly proportional to the time available to the intruder. Forcing the intruder to exit immediately, empty-handed and without confrontation, is the ultimate solution in any intrusion.

Inferno - intolerable to intruders.
